VOLUME XIII

INDEX OF SUBJECTS AND AUTHORS

Only main topics are listed, and reference is given to the first page of each paper in which they are discussed

Abortive recombinants in $I^+ \times I^+$ bacterial crosses, 113
Acridines, genetic effect of, in *Pseudomonas aeruginosa*, 57
Acriflavine resistant rII deletions in bacteriophage T4, 329
Ascus development mutants in *Neurospora crassa*, 303
Attached-X deletion, lethal effects of in *Drosophila melanogaster*, 325

Bacteriophage T4, acriflavine resistant rII deletions, 329
Baker, L. H., 105
Basl, Mary, 303
Beisson, Janine, 85
Bell, A. E., 175
Bevan, E. A., 71
Braver, Gerald, 325
Burnet, Barrie, 251
Byrne, Barbara J., 197

Chromosomal polymorphism in *Spalax leucodon*, 99
Crow, James, F., 127
Chrysanthemum, nuclei acid content and chromosomal morphology of, 241
Colson, C., 227
Cost of natural selection, a vindication of Haldane's original theory despite complicating factors, 127
Curnow, R. N., 105
Curtis, C. F., 289
Cytoplasmic factor in killer phenotype in *Saccharomyces cerevisiae*, 71
Cytoplasmic respiratory deficiency induced by phenethyl alcohol in *Saccharomyces cerevisiae*, 107
Cytogenetic study of *Spalax leucodon* in Moldavia, 99

Dickinson, A. G., 213
Dowrick, G. J., 241
Drosophila melanogaster
  gene-environment interactions of *eye gene*, 313
  gene-environment interactions of *eyeless*, 251
  lethal effects of attached-X deletion, 325
  nutritional conditional mutants, 281
Duma, Doina, 99

Edwards, Susan, 321
El Bayoumi, A. S., 241
Episomal state, demonstration of, with genes in *Staphylococcus aureus*, 267
Escherichia coli
  genetics of host-controlled restriction and modification, 227
  $I^+ \times I^+$ crosses and unstable products, 113

Falconer, D. S., 25
Fertility, and ovulation rate in mouse, 25

Gene-environment interactions in *eyeless* and *eye gene* mutants of *Drosophila melanogaster*, 251, 313
Genetic disturbance after species transfer of linkage group H_2Lc_2 in *Gossypium*, 1
Glossina austeni, production of partially sterile mutants, 289
Glover, S. W., 227
Gossypium, genetic disturbance of linkage group after species transfer, 1

Hill, W. G., 143, 165
Holloway, B. W., 57
Host-controlled modification and restriction in *Escherichia coli*, 227
Hunt, David, M., 251, 313

I sex factors and chromosomal recombination in *Salmonella typhimurium*, 321

Johnson, D. R., 275
Johnston, Joan, 267

Kappa, mu and the metagon in *Paramecium aurelia*, 197
Killer character in *Saccharomyces cerevisiae*, 71

Kimura, Motoo, 47, 127
Krzanowska, H., 17

Land, R. B., 25
Linkage
  disequilibrium due to random genetic drift, 47
  H_2Lc_2 in *Gossypium*, reduction of recombination after species transfer, 1
  of thermosensitive mutants in *Paramecium aurelia*, 85
Loutit, J. S., 91

Mapping,
  of distal markers in *Pseudomonas aeruginosa*, 91
  of sites for host-controlled modification and restriction, 227
Maroudas, N. G., 107
Meikle, Veronica M. H., 213
Metagon hypothesis in *Paramecium aurelia*, lack of compatibility with results, 197
Meynell, G. G., 113, 327
Mouse
  brachyphalangy, an allele of extra-toes, 275
  comparison of biological characters of scrapie agents 22A and ME7, 213
  factor for spermatozoan abnormality on *Y*-chromosome, 17
  ovulation rate in, 25
Mutant
  brachyphalangy, an allele of extra-toes in mouse, 275
  eyeless and *eye gene* and environmental interactions, in *Drosophila melanogaster*, 251, 313
  production of partially sterile mutants of *Glossina austeni*, 289

Nash, David, 281
Natural selection, cost of, 127
Neurospora crassa mutants affecting ascus development, 303
Nucleic acid content and chromosome morphology in *Chrysanthemum*, 241
Nutritional conditional mutants of *Drosophila melanogaster*, 281

Ohta, Tomoko, 47
Ovulation rate in mouse, 25

Paramecium aurelia,
  a linkage group in, 85
  kappa, mu and the metagon, 197
Parma, David H., 329
Pike, Derek, J., 117
Plasmids as episomes in *Staphylococcus aureus*, 267
Polyploids, DNA content of natural and induced, in *Chrysanthemum*, 241
Probability transition matrices,
  and selection of finite populations, 143
  versus continuous distribution as methods of predicting gene frequency shifts in selected finite populations, 117
Pseudomonas aeruginosa
  genetic effect of acridines, 57
  mapping of distal markers, 91

Raicu, Petre, 99
Random genetic drift, 47
Recombination, reduction of values on species transfer, in *Gossypium*, 1
Repeated selection in finite populations: a comparison of methods of detection, 117
Richmond, M. H., 267
Rossignol, Michele, 85

Saccharomyces cerevisiae
  induction of cytoplasmic respiratory deficiency with phenethyl alcohol, 107
  inheritance of killer character, 71
Salmonella typhimurium
  $I^+ \times I^+$ crosses and unstable products, 113
  I sex factor and chromosomal recombination, 321
Saunders, J. H., 1
Scrapie, comparison of biological properties of 22A and ME7 in mouse, 213
Selection
  artificial in finite populations, 143
  effect of repeated cycles in populations of finite size, 105
  for larval growth under two levels of nutrition in *Tribolium castaneum*, 175
  for natural and induced ovulation rates in mouse, 25
  natural, and gene substitution, 127
  rate of advance for non-additive loci, 165
Sex factor of *Pseudomonas aeruginosa* and effect of acridines, 57
Somers, J. M., 71
Spalax leucodon, cytogenetic studies of, 99
Spermatozoan abnormality, a factor on *Y*-chromosomes in mouse, 17
Srb, Adrian M., 303
Stanisich, Vilma, 57
Staphylococcus aureus, reversible transition between episomal states, 267
Superinfection immunity in $I^+ \times I^+$ crosses in bacteria, 113

Thermosensitive mutants in a linkage group in *Paramecium aurelia*, 85
Thomson, James N. Jun., 325
Tribolium castaneum, selection for larval growth on two levels of nutrition, 175

Vyse, E. R., 281

Wilkie, D., 107

Yamada, Yukio, 175
Y-chromosome factor for sperm abnormality in mouse, 17

CONTENTS

No. 1 (February 1969)

SAUNDERS, J. H. Changes in recombination and genetic disturbance on transferring the H_2Lc_2 linkage group from *Gossypium tomentosum* to *G. barbadense* and *G. hirsutum* *page* 1

KRZANOWSKA, H. Factor responsible for spermatozoan abnormality located on the Y chromosome in mice 17

LAND, R. B. and FALCONER, D. S. Genetic studies of ovulation rate in the mouse 25

OHTA, TOMOKO and KIMURA, MOTOO. Linkage disequilibrium due to random genetic drift 47

STANISICH, VILMA and HOLLOWAY, B. W. Genetic effects of acridines on *Pseudomonas aeruginosa* 57

SOMERS, J. M. and BEVAN, E. A. The inheritance of the killer character in yeast 71

BEISSON, JANINE and ROSSIGNOL, MICHELE. The first case of linkage in *Paramecium aurelia* 85

LOUTIT, J. S. Investigation of the mating system of *Pseudomonas aeruginosa* strain 1. IV. Mapping of distal markers 91

RAICU, PETRE and DUMA, DOINDA. Cytogenetical study in *Spalax leucodon* Nordm. in Moldavia (Rumania) 99

CURNOW, R. N. and BAKER, L. H. A correction to our earlier paper on 'The effect of repeated cycles of selection and regeneration in populations of finite size' 105

WILKIE, D. and MAROUDAS, N. G. Induction of cytoplasmic respiratory deficiency in yeast by phenethyl alcohol 107

MEYNELL, G. G. Exclusion superinfection immunity and abortive recombinants in I+ × I+ bacterial crosses 113

No. 2 (April 1969)

PIKE, DEREK J. A comparison of two methods for predicting changes in the distribution of gene frequency when selection is applied repeatedly to a finite population 117

KIMURA, MOTOO and CROW, JAMES F. Natural selection and gene substitution 127

HILL, W. G. On the theory of artificial selection in finite populations 143

HILL, W. G. The rate of selection advance for non-additive loci *page* 165

YAMADA, YUKIO and BELL, A. E. Selection for larval growth in *Tribolium* under two levels of nutrition 175

BYRNE, BARBARA J. Kappa, mu and the metagon hypothesis in *Paramecium aurelia* 197

DICKINSON, A. G. and MEIKLE, VERONICA M. H. A comparison of some biological characteristics of the mouse-passages scrapie agents, 22A and ME7 213

GLOVER, S. W. and COLSON, C. Genetics of host-controlled restriction and modification in *Escherichia coli* 227

No. 3 (June 1969)

DOWRICK, G. J. and EL BAYOUMI, A. S. Nucleic acid content and Chromosome morphology in *Chrysanthemum* 241

HUNT, DAVID N. and BURNET, BARRIE. Gene-environment interactions of the *eyeless* mutant in *Drosophila melanogaster* 251

RICHMOND, M. H. and JOHNSTON, JOAN. The reversible transition of certain genes in *Staphylococcus aureus* between the integrated and the extra-chromosomal state 267

JOHNSON, D. R. Brachyphalangy, an allele of extra-toes in the mouse 275

VYSE, E. R. and NASH, DAVID. Nutritional conditional mutants of *Drosophila melanogaster* 281

CURTIS, C. F. The production of partially sterile mutants in *Glossina austeni* 289

SRB, ADRIAN M. and BASL, MARY. The isolation of mutants affecting ascus development in *Neurospora crassa* and their analysis by a zygote complementation test 303

HUNT, DAVID M. Gene-environment interactions of the *eye-gene* mutant in *Drosophila melanogaster* and a comparison with *eyeless* 313

EDWARDS, SUSAN and MEYNELL, G. G. I sex factors and chromosomal recombination in *Salmonella typhimurium* 321

THOMPSON, JAMES N. JUN. and BRAVER, GERALD. Lethal effect of attached-*X* deletion in *Drosophila melanogaster* 325

PARMA, DAVID H. Acriflavin resistant *r*II deletions of bacteriophage T4 329

VOLUME XIV

INDEX OF SUBJECTS AND AUTHORS

Only main topics are listed, and reference is given to the first page of each paper in which they are discussed

Armstrong, B. L., 329
Ascobolus immersus, intragenic recombination, 33
Aspergillus amstelodami, correlated meiotic and mitotic maps, 185
Aspergillus nidulans,
  genetics and behaviour of methionine suppressors in heterokaryons and diploids, 275
  hypodiploid and hypohaploid nuclei, 127
  spontaneous intrachromosomal changes at mitosis, 63
Ayala, Francisco J., 95
Ayling, P. D., 275

Bacteriophage,
  λ and ϕ80, genetics and evidence for restriction targets in DNA, 151
  P 22, contransduction of *mot* C and *H1* in *Salmonella*, 45
  T4D, effect of homozygous deletion on heterozygote formation, 13
Beale, G. H., 341
Bevan, E. A., 71
Bhaskaran, K., 9
Blood glucose levels, inherited differences in Mouse, 1

Cannings, C., 167
Carlson, Peter S., 337
Cattanach, B. M., 223
Charlesworth, Deborah, 1
Chlamydomonas eugametos, induction of gene mutation and chromosome aberration in, 121
Chlamydomonas reinhardii, complementation tests of closely linked flagellar genes, 343
Chlosyne lacinia, polymorphic larval colour forms in, 333
Chung, Young S., 111
Cock, A. G., 237
Colicin B and F-like R factors, superinfection immunity and repressor susceptibility, 315
Complementation of closely linked flagellar genes of *Chlamydomonas reinhardii*, 343
Controlling elements on *X*-chromosome in Mouse, 223
Cooke, Marylyn, 79, 309
Cotransduction by P22 of *mot*C and *H1* in *Salmonella* species, 45
Cytoplasmic determinants, segregation of killer (k) and neutral (n) in *Saccharomyces cerevisiae*, 71

Dacus olea amount of variation at two esterase loci in Greek population, 249
Day, A. W., 195
Donch, John, 111, 159
Dosage compensation, a chromosomal basis in *Drosophila*, 137
Dove, William F., 151
Drosophila,
  action of gene *prune* (pn), 53
  chromosomal basis of dosage compensation, 137
  genetic polymorphism and interspecific competitive ability in, 95

Enomoto, Masatoshi, 45, 89
Erythromycin resistance in *Paramecium aurelia*, 341
Escherichia coli,
  chromosomal transfer mediated by derepressed R-factors, 79
  derepressed F-like R-factors and Hfr transfer, 309
  effect of *recA* gene on cell division and polysaccharide production in *lon* strain, 159
  inhibition of DNA synthesis and u.v. sensitive Bs strains, 111
  a method of selecting streptomycin sensitive R-factors, 323
  phenotypic suppression by streptomycin analogues, 259
  recA uvrB double mutant and bacteriophage, 291
  restriction targets in λ and ϕ80 bacteriophages, 151

superinfection immunity and repressor sensitivity, 315
Esterase loci, amount of variation at two, in Greek population of *Dacus oleae*, 249
Eye colour *prune* (pn) in *Drosophila melanogaster* 53

Falk, Raphael, 53
Ferns, production of auxotrophic mutants, 337
Finlayson, J. S., 329
F-like R factors, derepressed, and effect on Hfr transfer in *E. coli*, 309
Fowl, genetic studies on growth and form, 237
Franklin, Naomi C., 151
Frydman, Anna, 315

Gene action of *prune* (pn) in *D. melanogaster*, 53
Glucose levels inherited differences in blood, in Mouse, 1
Gorodenski, Stanley A., 333
Gowans, C. S., 121
Green, Michael H. L., 111, 159
Greenberg, Joseph, 111, 159

Harwood, J. H., 259, 323
Hertman, I. M., 291
Heteroduplex formation in Bacteriophage T4D, 13
Hudson, D. M., 329
Hypodiploid and hypohaploid nuclei in *Aspergillus nidulans*, 127

Interspecific competitive ability and genetic polymorphism in *Drosophila*, 95
Intragenic recombination, mutant and cross specificity in *Ascobolus immersus*, 33
Isocitrate dehydrogenase variation within C3H inbred strain, 93
Iyer, S. S., 9

Janjigian, J., 323
Jones, J. K., 195

Killer (k) in *Saccharomyces cerevisiae*, 71
Krimbas, C. B., 249
Kvelland, Ingerid, 13

Lakhotia, S. C., 137
Lethal factor in strain of *Vibrio El Tor*, 9
Lewis, L. A., 185
Lifschytz, Eliezer, 53
Loutit, J. S., 103

Mating system, effect of Nitrosoguanidine on, in *Pseudomonas aeruginosa*, 103.
Matrix methods to study multiallelic genetic systems, 167
McBride, A. C., 121
McLaren, Anne, 93
Meiotic and mitotic maps, correlated in *Aspergillus amstelodami*, 185
Meredith, R., 163
Methionine suppressors, genetics and behaviour in heterokaryons of *Aspergillus nidulans*, 275
Meynell, Elinor, 79, 309, 315
Mitotic nonconformity in *Aspergillus nidulans*, 63, 127
Mouse,
controlling elements on *X*-chromosome, 223
cytoplasmic isocitrate dehydrogenase variation in C3H inbred strain, 93
location of *mup-a* in linkage group VIII, 329
muted, a new mutant affecting coat colour and otoliths, 163
small inherited differences in blood glucose levels, 1
Motility, cotransduction with serotype genes in *Salmonella*, 45
Mukherjee, A. S., 137
Multiallelic genetic systems by matrix methods, 167
Mup-a locus on linkage group VIII in Mouse, 329
Mutation, by phenylalanine analogue in *Chlamydomonas*, 121
Muted, a new mutant affecting coat colour and otoliths in Mouse, 163

Neutral (n) in *Saccharomyces cerevisiae*, 71
Nga, B. H., 63, 127
Nitrosoguanidine, effect on donor in mating of *Pseudomonas aeruginosa*, 103

Paramecium aurelia, erythromycin resistance in, 341
Parasexual and sexual analysis of *Ustilago violacea*, 195
Paszewski, A., 33
Perez, J. N., 223
Phenotypic suppression by streptomycin analogues, in *E. coli*, 259
Phenylalanine analogue (APBA), effect on gene mutation and chromosome aberration in *Chlamydomonas*, 121
Pollard, C. E., 223
Polymorphic larval colour forms in *Chlosyne lacinia*, 333
Polymorphism and interspecific competitive ability in *Drosophila*, 95

Prazmo, W., 33
Pseudomonas aeruginosa, mating system, effect of nitrosoguanidine on donor, 103

RecA gene suppresses u.v. induced filimentation in *lon* strain of *E. coli*, 159
Recombination,
deficient *recA* and *uvrB* double mutant in *E. coli*, 291
heteroduplexes and terminal redundancies in bacteriophage T4D, 13
mutant and cross specificity on pattern of intragenic, 33
Restriction targets in λ and $\phi 80$ bacteriophages, 151
R-factors mediating chromosomal transfer in F$^-$ *E. coli*, 79
Roper, J. A., 62, 127

Saccharomyces cerevisiae, somatic segregation of killer (k) and neutral (n) cytoplasmic determinants, 71
Salmonella,
frequency of cotransduction of *mot*C and *H1* by P22, 45
isolating *mot*$^-$ paralysed mutants from non flagellated cells, 89
Selection,
of auxotrophic mutants in Fern, 337
complexity of changes in skeletal proportions after, in Fowl, 237
of paralysed from non-flagellate cells of *Salmonella*, 89
of streptomycin sensitive mutants of R-factors in *E. coli*, 323
Sexual and parasexual analysis of *Ustilago violacea*, 195
Skeletal proportions, complex changes produced by selection in Fowl, 237
Smith, D. H., 259, 323
Somers, J. M., 71
Superinfection immunity between derepressed F-like R-factors and colicin B factors in *E. coli*, 315
Suppression, methionine, in *Aspergillus nidulans*, 275
Starling, David, 343
Streptomycin analogues, phenotypic suppression in *E. coli*, 259

Tait, Andrew, 93
Terminal redundancy in bacteriophage T4D, 13
Translocation instability at mitosis in *Asperguillus nidulans*, 63

Ultraviolet sensitivity,
effect of DNA synthesis inhibition on Bs strains of *E. coli*, 111
uvrB and *recA* double mutant in *E. coli*, 291
Ustilago violacea, sexual and parasexual analysis of, 195

Vibrio El Tor, a lethal factor in, 9

X-chromosome control elements and their influence on *X*-linked genes in Mouse, 223

Yamaguchi, Shigeru, 45

Zouros, E., 249

CONTENTS

No. 1 (August 1969)

CHARLESWORTH, DEBORAH. Small, inherited differences in blood glucose levels in mice *page* 1

IYER, S. S. and BHASKARAN, K. A lethal factor in a strain of *Vibrio El Tor* 9

KVELLAND, INGERID. The effect of homozygous deletions upon heterozygote formation in bacteriophage T4D 13

PASZEWSKI, A. and PRAZMO, W. The bearing of mutant and cross specificity on the pattern of intragenic recombination 33

ENOMOTO, MASATOSHI and YAMAGUCHI, SHIGERU. Different frequencies of cotransduction of *motC* and *H1* in *Salmonella* 45

LIFSCHYTZ, ELIEZER and FALK, RAPHAEL. The action of the gene *prune* (*pn*) in *Drosophila melanogaster* 53

NGA, B. H. and ROPER, J. A. A system generating spontaneous intrachromosomal changes at mitosis in *Aspergillus nidulans* 63

BEVAN, E. A. and SOMERS, J. M. Somatic segregation of the killer (k) and neutral (n) cytoplasmic genetic determinants in yeast 71

COOKE, MARYLYN and MEYNELL, ELINOR. Chromosomal transfer mediated by depressed R factors in F^- *Escherichia coli* K 12 79

ENOMOTO, MASATOSHI. A method for isolating paralysed (*mot*$^-$) mutants from non-flagellated cells of Salmonella 89

MCLAREN, ANNE and TAIT, ANDREW. Cytoplasmic isocitrate dehydrogenase variation within the C3H inbred strain 93

No. 2 (October 1969)

AYALA, FRANCISCO J. Genetic polymorphism and interspecific competitive ability in *Drosophila* 95

LOUTIT, J. S. Investigation of the mating system of *Pseudomonas aeruginosa* strain 1, V. The effect of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine on a donor strain 103

GREEN, MICHAEL H. L., DONCH, JOHN, CHUNG, YOUNG S. and GREENBERG, JOSEPH. Effect of inhibition of DNA synthesis on u.v. sensitive Bs strains of *Escherichia coli* 111

McBride, A. C. and Gowans, C. S. The induction of gene mutation and chromosome aberration in *Chlamydomonas eugametos* by a phenylalanine analog *page* 121

Roper, J. A. and Nga, B. H. Mitotic non-conformity in *Aspergillus nidulans*: the production of hypodiploid and hypohaploid nuclei 127

Lakhotia, S. C. and Mukherjee, A. S. Chromosomal basis of dosage compensation in *Drosophila*. I. Cellular autonomy of hyperactivity of the male X-chromosome in salivary glands and sex differentiation 137

Franklin, Naomi C. and Dove, Williams F. Genetic evidence for restriction targets in the DNA of phages λ and ϕ80 151

Green, Michael H. L., Greenberg, Joseph and Donch, John. Effect of a *recA* gene on cell division and capsular polysaccharide production in a *lon* strain of *Escherichia coli* 159

Lyon, Mary F. and Meredith, R. *Muted*, a new mutant affecting coat colour and otoliths of the mouse, and its position in linkage group XIV 163

No. 3 (December 1969)

Cannings, C. The study of multiallelic genetic systems by matrix methods 167

Lewis, L. A. Correlated meiotic and mitotic maps in *Aspergillus amstelodami* 185

Day, A. W. and Jones, J. K. Sexual and parasexual analysis of *Ustilago violacea* 195

Cattanach, B. M., Pollard, C. E. and Perez, J. N. Controlling elements in the mouse *X*-chromosome. I. Interaction with the X-linked genes 223

Cock, A. G. Genetical studies on growth and form in the fowl. 2. The complexity of changes in skeletal proportions produced by selection 237

Zouros, E. and Krimbas, C. B. The genetics of *Dacus oleae*. III. Amount of variation at two esterase loci in a Greek population 249

Harwood, J. H. and Smith, David H. Phenotypic suppression by streptomycin-adenylate and bluensomycin-adenylate 259

Ayling, P. D. Methionine suppressors in *Aspergillus nidulans*: their genetics and behaviour in heterokaryons and diploids 275

Hertman, I. M. Survival, DNA-breakdown and induction of prophage lambda in a *Escherichia coli* K12 *recAuvrB* double mutant 291

Meynell, Elinor and Cooke, Marylyn. Repressor-minus and operator-constitutive de-repressed mutants of F-like R factors: their effect on chromosomal transfer by HfrC 309

FRYDMAN, ANNA and MEYNELL, ELINOR. Interactions between de-repressed F-like R factors and wild type Colicin B factors: superinfection immunity and repressor susceptibility *page* 315

HARWOOD, J. H., JANJIGIAN, J. and SMITH, D. H. A method for selecting streptomycin-sensitive mutants of R factors which adenylate streptomycin 323

FINLAYSON, J. S., HUDSON, D. M. and ARMSTRONG, B. L. Location of the *Mup-a* locus on mouse linage group VIII 329

GORODENSKI, STANLEY, A. The genetics of three polymorphic larval colour forms of *Chlosyne lacinia* (Lepidoptera, Nymphalidae) 333

CARLSON, PETER S. Production of auxotrophic mutants in ferns 337

BEALE, G. H. A note on the inheritance of erythromycin-resistance in *Paramecium aurelia* 341

STARLING, DAVID. Complementation tests on closely linked flagellar genes in *Chlamydomonas reinhardii* 343
